1991 Census - Customised Matrixes, Australia**2714.0***Price on application - Microfiche, magnetic tape, floppy disk and cartridge*

For the 1991 Census of Population and Housing, tabulations which cross-classify a number of census variables are known as matrixes (these were previously known as cross-classified tables). Clients are able to order a customised matrix, specifying their own combination of census variables and geographic levels (based on census geographic units), that are not available in a standard matrix provided the matrix does not breach confidentiality rules. Customised matrixes can be produced by place of enumeration or by place of usual residence.

1991 Census - Community Profiles, Australia**2722.0***Price on application - Microfiche, magnetic tape, floppy disk and cartridge*

Community Profiles comprise census data for all geographic areas, from Collection Districts (CDs) to total Australia. Each Community Profile is a set of tables containing key census characteristics of persons, families and dwellings, covering most topics on the census form.

Explanatory notes and footnotes are included with each Community Profile.

The Basic Community Profile provides 58 tables for all census areas from CD to total Australia, including postcode. The Basic Community Profile replaces the "7 page" small area format released from the 1986 Census, and contains about 70% more data.

The Expanded Community Profile provides 44 tables and is available for statistical local areas (SLAs) and all other census geographic areas, except for CDs, CD derived Suburbs, postcodes and rural localities. It comprises more detailed versions of some of the basic profile tables, plus some new tables. This replaces the "21 page" format small area data from the 1986 Census.

The Working Population Profile contains 17 tables of labour force and related data on the characteristics of people who work in SLAs within the journey to work study area - usually capital cities.

The Time Series Community Profile contains approximately 22 tables from the Basic and Expanded Profiles comparing data from the 1981, 1986 and 1991 Census where the classifications are comparable. It is available for SLAs and aggregates of SLAs.

The Usual Residents Community Profile contains approximately 25 tables based on the usual residents of SLAs.

The Aboriginal and Torres Strait Islander People Community Profile contains 29 tables based on the Basic Community Profile. It is available for ATSIC regions and communities, SLAs containing 80 or more Aboriginal and Torres Strait Islander people, sections of State, statistical divisions and States/Territories.
